

*Presented at the FIG Working Week 2017,  
May 29 - June 2, 2017 in Helsinki, Finland*

# **Land administration quality assessment: LGAF, DoingBusiness, WPLA UNECE. What next?**

**Sergei Shavrov, Olga Batura, Miroslav Kobasa,  
Belarus**

FIG Working Week 2017 "Surveying the world of tomorrow - From digitalisation to augmented reality", Helsinki, Finland May 29 - June 2, 2017.

**TS01A  
Improving Procedures in Land Management**

# Land Governance and Land Administration quality assessment today

THE WORLD BANK

Working for a World Free of Poverty

- ❑ Land Governance Assessment Framework (LGAF): LGII6 "Completeness of the Register", LGII7 "Reliability", LGII8 "Cost-Effectiveness and accessibility of land administration services".

THE WC

Working for Free of Pov

I  
ir  
la

# Expert methodology , off-line, time consuming

- WPLA UNECE. Overview of 2016, Indexes: coverage, availability of online services, state guarantees, registration and other state fees, registration speed, a type of registration system, types of actions, gender equality.

# Digital transformation of society

Food and Agriculture Organization of the United Nations

Land Reform

Land Allotment → Land Administration → **Land Governance**

$$KPI_{LA} = F(KPI_{LG})$$

Drivers: Innovative Te

**Monitoring on-line is possible today !**

**E-government;** multilevel RS; crowdsourcing, e-participation; e-decision making; big data; cloud computing; nation geospatial platforms; GNSS; VGI; SDI; BIM; M-telephony; 3D-modeling; ERP-, CRM-systems for facility-management.

# What is Land Governance (LG) Monitoring?

Land Governance (LG) Monitoring is a regular automated reporting system on key indicators KPI that correspond to the functional areas of land governance. It relies on existing administrative data from various sources as a primary source of information

# Model of on-line LA/LG quality assessment monitoring. Process approach:

---

- **Technical infrastructure**
- LA/LG BPs specification
- Model for every BP
- Specification KPI for every BP
- BP KPI on-line calculation in the technical system
- Real-time LA/LG quality assessment
- Systematic LA/LG impact assessment
- **BP improvement or reengineering**

# Technical infrastructure

**G, B, C**

E-Services Portal

Geospatial Platform

**Inclusive e-participation management !**

# LG BP specification

## Land Governance BP groups for quality monitoring

<u>LAND ALLOTMENT</u>	LAND MARKET BP	<u>LAND DEVELOPMENT</u>
URBANIZATION	<u>TENURE REGULARIZATION</u>	LAND USE PLANNING
LAND RIGHT TERMINATION	ENCUMBRANCE OF LAND RIGHT	LAND DEVELOPMENT
REAL ESTATE REDEVELOPMENT	OPERATION OF REAL ESTATE OBJECTS	ADMINISTRATIVE PROCEDURES IN CONSTRUCTION
LAND PROTECTION	ADMINISTRATION OF PROPERTY TAX	.....

~120!

# Tools for BP models

- *SADT (IDEFo) or*
- *IDEF<sub>3</sub> - IDEFo or*
- *DFD or*
- *ARIS or*
- *UML ol*
- Case-tool BPwin (PLATINUM technology)
- Silverrun (Silverrun technology) or
- Oracle Designer (Oracle) or
- Rational Rose.

**E-Government tool !**

# Specification KPI for every BP

- Duration
- Cost
- Transparency
- Social Accountability
- Number per time unit
- *Monitoring Indicators*
- *Number (and prices where possible) of registered transactions of different types;*
- *Receipts of land tax revenue;*
- *Share of communal, private, and state land mapped;*
- *Cases of expropriation and privatization;*
- *Number of land-related conflicts in the courts;*
- *Share of agricultural/residential land registered and mapped in women's/men's name or in*
- ...

BP KPI on-line calculation in the technical system  
Real-time LA/LG quality assessment  
Systematic LA/LG quality assessment

---

Continuously operating automated expert system has to carry out calculation of KPI of separate land governance processes in real time and draw conclusions about its quality.

Territory Units, whole country

**Infrastructure of E-  
Government !**

# The reform of cadastral systems for LG BP improvement

---

1. *LA: Registration, accumulation and distribution of territorial planning documents, including land consolidations and land readjustment documents.*

**LG: Input signals for LG System**

2. *LA: Property registration on the basis of BIM (buildings information models).*

**LG: Development, redevelopment, 3D facility management, in LG System**

3. *LA: Registration of facts, phenomenon, land events according to geo-monitoring based on cadastral data and remote sensing.*

**LG: Feedback of LG System improvement**

---

4. *LA: Registration of the creation, modification and termination of underground engineering structures*

**LG: Administrative procedures for excavation permissions of LG System**

5. *LA: Registration of events in sphere of urban development activities.*

**LG: On-line monitoring of LG activity in urban areas**

6. *LA: Registration of e-public discussion of land governance projects.*

**LG: e-decision making with e-participation in inclusive LG**

.....

# KPI for the land administration quality assessment

---

- LAI1. *Legal support of spatial data infrastructure.*
- LAI2. *Unified geospatial platform is used for territorial governance.*
- LAI3. *Cadastral data integrity.*
- LAI4. *Cadastral data completeness*
- LAI5. *BIM are the grounds for Real Estate registration*
- LAI6. *Excavations in the country are operated by cadastral data.*

# KPI for the land administration quality assessment

---

- LAI7. Cadastre provides publicity and transparency of territorial land use planning projects.
- LAI8. Cadastre provides publicity and transparency of administrative inspections of land relations objects.
- LAI9. Cadastre support e-decisions making, e-consultancy and e-information participation in land governance purpose
- LAI10. Cadastre provides the urban development monitoring.

.....

# Conclusions

---

1. LG/LA quality on line monitoring, not off-line expert evaluation.
2. LGMS – land governance monitoring system
3. LGMS ◀- **E-government + Cadastre/Registers + Remote Sensing System**
4. **Process approach**
5. **Models of  $BP_{LG}$  - are E-Government instrument**
6. **KPI for every  $BP_{LG}$**
7. **KPI calculation by LGMS**
8. **LA and LG BP improvement or reengineering**

# ISO 19152

---

- Upgrading respectively the LADM standard ISO19152 is recommend

**Thanks for attention**  
**shavrov@ipps.by**
